

Trying to silence XM Radio is like walking into a gay bar and yelling "Fuck all you fags!" It's the single most unproductive action any lobbyist can take not to mention it is a violation of the first admendment. You'd better spend your time lobbying for something that really matters. Why not go bother the tobacco company some more so we can outlaw cancer sticks altogether?

\*The above quote was not meant to offend gays. It is just an attempt to show how futile and ridiculous the decisions for lobbying against XM really is.\*
